2. The IDS filed 01/12/04 is missing from the file. Applicant is respectfully requested to resubmit the IDS for consideration.
3. The Request for Withdrawal of Attorney filed 02/09/04 has been entered as paper no. 18.
4. The Decision on 02/24/04 for the Request for Withdrawal of Attorney was not approved and was entered as paper no. 19.
5. The Request for Withdrawal of Attorney filed 02/02/04 has been entered as paper no. 20.
6. The Decision on 03/08/04 for the Request for Withdrawal of Attorney was not approved and was entered as paper no. 21.

Election/Restrictions

7. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-6, 11-15, 40, 41, 47-51, and 57-61, drawn to receiving a definition of a reverse star schema meta-model, classified in class 705, subclass 10.

Art Unit: 3624

II. Claims 30-33, 55, 56, 65, and 66, drawn to defining a virtual data model having a reverse star schema organization, classified in class 707, subclass 104.1.

III. Claims 52-54 and 62-64, drawn to receiving a virtual data model definition having a reverse star schema organization, classified in class 707, subclass 2.

8. Inventions I, II, and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as receiving a definition of a reverse star schema meta-model, receiving the definition of a customer profile group, generating a data warehouse, receiving input indicating a quantity of interest in the information, dynamically creating a generated database, and displaying a portion of the dynamically generated database. Group II has separate utility such as defining based upon a virtual data model, receiving as input a definition of a second data model, creating a first mapping and a second mapping, and analyzing information based upon the second data model. Group III has separate utility such as receiving a first schema database, receiving a virtual data model definition, mapping information from the first schema database to a second schema database. See MPEP § 806.05(d).

9. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 3624

10. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Groups II and III, the search for Group II is not required for Groups I and III, and the search for Group III is not required for Groups I and II, restriction for examination purposes as indicated is proper.

11. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be completed must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
